

# Solar tracking system logistics support

An off-grid solar system's size depends on factors such as your daily energy consumption, local sunlight availability, chosen equipment, the appliances that you're trying to run, and system configuration.

To achieve this, DB Cargo is now implementing the IoTgo Track-Solar rail solution from Giesecke+Devrient (G+D), which provides efficient, sustainable, and maintenance-free tracking....

The solar cell and 27 Ah battery support a continuous power supply for location-independent operation, allowing tracking for several months at low transmission intervals even without sunlight. Track-Solar can be installed wirelessly on any ...
