

Solid surfacing company ltd

What is Solid Surfacing Company?

Solid Surfacing Company is a company that works with a wide range of solid surface, laminate, compact-grade laminate and wooden materials to bring you the best choice of colours, textures and patterns on the market. We tailor all of our projects to your individual budget and specifications, for outstanding results.

What services does solid surfacing company offer?

Our manufacturing services also offer unique products like home bars and other bespoke, conceptual furniture, fixtures and fittings that complete a room. From deli and reception counters to school and airport furniture, Solid Surfacing Company has made it all.

Who makes solid surface worktops?

Whether you are looking for beautiful, solid surface worktops for your kitchen, bathroom or home bar, Solid Surfacing Company has the solution. We can make custom moulded products to keep your home looking sleek and modern.

What is solid surface made of?

Solid surface is made of one part acrylic and two parts natural minerals. This makes it more versatile and easier to manipulate than marble, granite, and other stone equivalents. Pigments and textured pieces can also be added to the mix for a unique color and authentic texture.

Are solid surface materials toxic?

Solid surface materials do not contain any toxic products or hazardous pollutants. They have been accredited by many environmental protection bodies, including BREEAM, LEED and GreenGuard®. At Solid Surfacing, we work with a wide range of solid, laminate, compact-grade laminate, and wooden materials to bring you the best choice.

Why should you choose a solid surface?

Celebrating over 30 years established, we expertly fabricate and install solid surfaces in kitchens, bathrooms, and commercial settings nationwide. Solid surface materials are both versatile and visually appealing. They can be joined almost seamlessly, making them the ideal choice when it comes to elegant worktops that are also easy to maintain.
