Solar PV is a type of renewable energy. Solar PV panels are placed on the rooftop of a house or building. They capture sunlight and convert it into electricity. Solar PV is a clean and environmentally friendly source of energy. It does not produce air pollution or greenhouse gases. Solar PV is also a quiet source of energy.

Our goal here at Culture Energy is to make going solar easy and affordable. All systems are custom designed to fit your energy needs and your budget. Big Savings just a click away ... They transform the sun's rays into direct current electricity. BATTERY. Stores the energy produced during the day to be used at night and in blackouts.

Solar panels, also known as solar photovoltaics (PV), capture energy from sunlight to make electricity. This can be used to run your appliances and lighting. Solar PV needs light, but not direct sunlight, to work. They can still make some electricity on a cloudy day. Sunlight is free, so once installed, your electricity costs will be reduced.
