

Technical regulations for weak-current installation of photovoltaic panels

What are the regulatory levels for photovoltaic systems?

At least three regulatory levels for the production, installation, operation and end of life of photovoltaic systems can be considered. Additionally, the Life Cycle Assessment methodology is also regulated by standards. In this chapter, the three levels are presented.

What is a roof mounted photovoltaic system guidance?

The guidance refers only to the mechanical installation of roof mounted integrated and stand-off photovoltaic systems; it provides best practice guidance on installation requirements and does not constitute fixing instructions.

Are there any UK standards relating to a PV installation?

While many UK standards apply in general terms, at the time of writing there is still relatively little which specifically relates to a PV installation. However, there are two documents which specifically relate to the installation of these systems that are of particular relevance:

What does the new solar PV standard mean for solar PV installers?

The timely new Standard comes as strong signs of recovery can be seen after a turbulent 18-months for Solar PV installers. The publication coincides with MCS reporting encouraging volumes of Solar PV installations despite the government closing the Feed in Tariff (FiT) incentive in March 2019.

Do solar PV systems need electrical testing?

Periodic electrical testing of solar PV systems to identify and confirm continued safe operation and maximum energy output performance can be required as part of product warranties and PV system component guarantees. As the number of rooftop solar installation systems have grown over the years, so have the number of reported incidents of fires.

Are there building regulations for solar panels?

There are building regulations for solar panels, as there are for most home improvements. These government regulations are frequently updated to ensure that any alterations made to properties don't threaten the safety or health of people who live or work in them.
