

This result underscores the strategic potential of solar and wind for Iran's energy transition. Policy recommendations include modernizing grid infrastructure, expanding renewable energy ...

The potential of renewables in addressing Iran's energy challenges is immense, given the country's abundant solar, wind, biomass, and geothermal resources. The goal is to generate ...

TEHRAN - Iran's Renewable Energy and Energy Efficiency Organization (SATBA) has reported significant progress in the construction of 1,000 local solar power plants, each with a capacity ...

TEHRAN -- Iran's Supreme Economic Coordination Council, chaired by President Masoud Pezeshkian, has approved new financial incentives to support the private sector's involvement ...

This study investigates Iran's renewable energy options using a hybrid multi-criteria decision-making framework, motivated by the country's urgent need to diversify its heavily fossil-fuel ...

TEHRAN - Iran's Minister of Energy Abbas Aliabadi highlighted a strong private sector appetite for investment in renewable energy projects, revealing a demand exceeding 78,000 megawatts ...

International Journalists Explore Sustainable Development in Dalian, Liaoning Province Introduction to Dalian's Role in Sustainable Development A delegation of international ...

The solar farm, spanning 1,200 hectares, is expected to play a key role in reducing reliance on fossil fuels and expanding Iran's renewable energy capacity. Built with a EUR305 million ...

Why increasing renewable energy alone can't solve climate crisis Why increasing renewable energy alone can't solve climate crisis In recent years, the world has witnessed a boom in the ...

The world's current trend toward energy instability shares some parallels with the 1970s oil crisis, which prompted an upsurge of United States and European solar research laboratories to ...

Geothermal energy is emerging as a critical clean energy source, with new technological approaches like advanced drilling and nuclear fusion-based methods aiming to tap into the Earth's vast heat ...

The Renewable Energy Statistics 2025, released by the International Renewable Energy Agency (IRENA), show that despite renewable capacity growing by over 15 percent in 2024, the growth gap widens across regions. The renewable ...

Tehran renewable energy growth

Iran is making significant strides towards its renewable energy ambitions by inaugurating a 500-megawatt (MW) hybrid solar power plant. This cutting-edge project, situated at the Karkheh ...

President Trump has launched a sweeping campaign to dismantle renewable energy progress in the U.S., favoring fossil fuels and imposing new restrictions that threaten solar and wind ...

Tehran renewable energy growth
