

Texas solar energy program

How much does solar cost in Texas?

The cost of solar in Texas is higher than the national average, but with rising electricity rates and hot Texas summers, installing solar panels may save you thousands on your energy bills. Based on data from the Lawrence Berkeley National Lab, the average solar system in Texas costs \$4.01 per watt, while the average price in the U.S. is \$3.67.

What solar incentives are available in Texas?

The federal government offers the Residential Clean Energy Credit, a 30% tax credit on the total cost of your solar system. The federal credit alone could save you \$10,346 on an 8.6 kW solar system in Texas. Explore other Texas solar incentives in the following table. Solar incentives in Austin AEP Texas SMART Source Solar PV Program

Is Texas a solar-friendly state?

Along with the federal tax credit for solar panels, Texas provides its own incentives to encourage residents to install solar panels and batteries. Those incentives are strong enough to earn Texas a spot on CNET's list of most solar-friendly states.

How do Solar credits work in Texas?

You can earn credits to offset up to 100% of your energy charges on your monthly utility bills. This program is similar to net metering in other states. (AEP) Solar Rebate Texans that get energy from AEP are eligible for a cash incentive between \$2,500 to \$8,500 for the kW of solar power installed in their home.

Does Texas have a solar tax credit?

Texas currently does not have a state solar tax credit, rebate program or net metering plan. Most incentives for solar energy in Texas come from local governments or specific energy companies. Texas does offer a statewide property tax exemption for solar panels.

How can I make solar more affordable in Texas?

Cities like Austin and Houston have specific programs to make solar more affordable. Check your city and local utility's website for incentives in your area. Texas solar owners are eligible for a property tax exemption and the 30% federal solar tax credit.

The cost of solar in Texas is higher than the national average, but with rising electricity rates and hot Texas summers, installing solar panels may save you thousands on your energy bills. Based on data from the Lawrence Berkeley National Lab, the average solar system in Texas costs \$4.01 per watt, while the average price in the U.S. is \$3.67.
