

# The latest EU certification standards for photovoltaic panels

Will a new European Solar charter support EU photovoltaic manufacturing?

Leaders pledge extended support with new European Solar Charter to back European EU photovoltaic manufacturing. Leaders of 23 EU member states and the European Commission have signed a Solar Charter pledging to step up financing opportunities, skills capacity and to address unfair competition in the bloc during an Energy Council.

How does the EU support the European solar PV manufacturing sector?

Over the last years, the EU has taken initiatives to strengthen its support to the European solar PV manufacturing sector, which includes several globally competitive companies in several steps of the value chain.

What is the EU solar standard?

From 2026, the EU Solar Standard will require solar rooftop installations across a significant proportion of Europe's building stock. The EU Solar Standard puts the power in citizens' hands and will enshrine the energy transition into the places where we sleep, work, and live.

Will the European Parliament adopt the EU solar standard in 2026?

Jan Osenberg, Senior Policy Advisor at SolarPower Europe, said (he/him): "Today, the European Parliament reached a huge milestone to accelerate renewable deployment, by adopting the EU Solar Standard. From 2026, the EU Solar Standard will require solar rooftop installations across a significant proportion of Europe's building stock.

When will the European Solar charter be implemented?

One year following the signature of the Charter, the Commission will review the implementation of the adopted commitments. The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

What is EU PVSEC?

EU PVSEC The JRC's European Solar Test Installation carries out research on reliable and accurate measurements for photovoltaic devices and supports the EU in meeting its targets for renewable energy.

The European Solar Test Installation (ESTI) is a European reference laboratory for calibration of photovoltaic (PV) devices and for the verification of their energy generation. Since its launch in the late 1970's, it also has been the forefront of ...

Australia enforces a robust framework for solar panel quality and safety. Here are the key players and standards involved: Clean Energy Council (CEC): The CEC is the peak body for Australia's clean energy
