

# The property does not allow the installation of photovoltaic panels

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do you need planning permission for solar panels?

Plus, the need for businesses to get planning permission for solar panels that generate over 1MW of electricity has also been removed, making it easier and quicker for organisations to go solar as well. The government also emphasises using developed land for solar panels.

Can solar panels be installed on a flat roof?

Permitted development rights for solar panels have been extended with planning permission no longer being required for installation on homes with flat roofs. The changes will aim to empower more property owners to effortlessly install solar panels on their roofs, bypassing the often time-consuming planning system.
