What are TBTs & how do they affect Chinese photovoltaic products?

TBTs can reflect the level of strictness in technical requirements imposed by trade partner countries on imported products, and they are used to assess the impact of these barriers on the export of Chinese photovoltaic products. GDP\_growth: Annual Gross Domestic Product (GDP) growth rate, representing a country's economic growth rate.

Do TBT notifications affect the trade value of photovoltaic products?

In model (12), the interaction term between TBT and CO<sub>2</sub> emissions ( $c.TBT \times c.co2$ ) is included in the regression model. The results show that the interaction term is significantly positive, suggesting that as CO<sub>2</sub> emissions increase, the negative impact of the number of TBT notifications on the trade value of photovoltaic products becomes weak.

Should China optimize its TBT policies for photovoltaic products?

China should optimize its TBT (Technical Barriers to Trade) policies for photovoltaic products by enhancing product quality and technical standards to ensure compliance with international standards such as those established by the International Electrotechnical Commission (IEC) and the International Organization for Standardization (ISO).

How do photovoltaic panels affect urban air temperature?

The energy balance of (a) an arbitrary dry urban surface and (b) that surface shaded by a photovoltaic panel. In this example, the urban surface can be bare ground, pavement, or a building rooftop (after Scherba et al., 2011). 3.2.1. Air temperature Photovoltaic panels impact the urban energy balance and can therefore affect urban air temperatures.

How can solar PV technology improve environmental sustainability?

Efforts involve adopting sustainable practices, cleaner manufacturing, efficient recycling, energy efficiency, alternative materials, and responsible land-use planning. Continuous research and innovation are essential for addressing these concerns and advancing the environmental sustainability of solar PV technology.
