

Top floor owners can install solar power generation

Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak Conservative government. Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

How much do solar panels make a flat owner?

In fact, flat owners will make a £2,601 profit after 25 years - the average life expectancy of a solar panel. However, flats are often left out of the solar panel discussion, as are renters. This is because getting permission to install panels for a flat can be complicated if you don't own the entire block. It's not impossible, however.

Should you install solar panels for flats & apartments in the UK?

Installing solar panels for flats and apartments in the UK can be a beneficial practice, especially if you are looking to cut down on your electricity bills. This is because solar panels have gotten more efficient and cheaper in the past few years, allowing for many more types of homes to install them with ease.

Can you install solar panels if you live in a flat?

Yes, you can install solar panels and benefit from solar power if you live in a flat, whether you own or rent. However, it is a bit more complicated than if you lived in a house. This is because you can't decide on your own to make any changes to the whole block of flats, unless you own the building.

Can solar panels be installed on a block of flats?

You can technically install solar panels on the wall of a block of flats, or even on the ground next to the wall. However, we usually recommend placing your solar panels on a south-facing roof, at an angle of between 20 and 50 degrees. Your panels will then be exposed to more sunlight, which will generate more electricity for you.
