

Skanska, as part of a joint venture, was awarded a \$25 million contract by Amtrak to reconstruct and upgrade existing shaft facilities serving the two North River Tunnels at Weehawken, N.J. The existing ventilation facilities ...

Tunnel dampers are volume control dampers that are built to withstand the intense conditions of tunnel air flow. They can be used for a variety of applications within a tunnel HVAC system, including air intake and exhaust. ...

A second collapse then blocked the tunnel and cut off communication with the surface. Company officials said the underground emergency shelter has enough supplies for "an extended stay," with the capacity to sustain about 16 people ...

Tunnels are important parts of our roads and cities. They help people travel safely under water, through mountains, or under busy streets. Good lighting in tunnels saves lives. It helps drivers ...

After evaluating four typical tunnel ventilation schemes, this study proposed achieving effective constant temperature control in TSFs using the most feasible approach, i.e., supply-air-based ...

2025-07-09 We are excited to showcase the latest site video of our long distance tunnel ventilator fan operating at a large tunnel excavation site. The tunnel has already reached 1,000 meters, ...

The state government has claimed that while the land has been handed over to the BMC for tunnel construction, the legal status of the transferred land will continue to remain "forest land".

Metropolitan city express line tunnels are fully enclosed and often span long distances between stations, allowing multiple trains within a single interval. Traditional segmented ventilation ...

Headhouse construction Currently, works are ongoing to build the ventilation shaft and satellite shaft with works to build the headhouse building planned from early 2025. A ventilation shaft, or vent shaft, is the vertical ...

Zheng Anping [11] investigated the ventilation modes and fire linkage modes of domestic subway stations, studying the principles of fire ventilation linkage modes in subway tunnel sections.

Founded in 1996, Chengdu Chengfei Green Environmental Technology Co., Ltd. has a long history of serving the greenhouse manufacturing industry, including specializing in vegetable ...

Tunnel ventilation emergency supply

In the event of an emergency, such as a fire inside a tunnel, ventilation systems truly spring into action. Imagine them as the ultimate problem-solvers, quickly transforming to handle urgent ...

The global emergency ventilation inverter market is experiencing robust growth, driven by increasing demand for reliable power solutions in critical infrastructure like hospitals, subway ...

The long distance tunnel ventilator fan removes harmful gases and dust while lowering the temperature inside the tunnel. This creates a safer and healthier workspace, allowing crews to ...

Tunnel dampers are used on incoming and outgoing sides of the station, as outgoing trains pull air while incoming trains push air. In emergency situations, many tunnel dampers are controlled remotely to keep fire and ...
