

UAE Energy Storage System Certification Requirements

How does the United Arab Emirates ensure energy-efficient electrical equipment?

The United Arab Emirates shall take all appropriate measures to ensure that electrical equipment may be energy-efficient when placed on the market or put into service only if it has been constructed in accordance with good engineering practices to ensure it meets defined energy consumption limits.

Why is energy storage important in Dubai?

"We follow the vision and directives of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, to ensure energy security and sustainability. Energy storage is a vital aspect in ensuring energy sustainability and increasing the reliance on clean and renewable energy sources.

How are EESL regulations enforced in the UAE?

EESL-regulations are enforced by the ECAS Product Certification scheme or - on a voluntary basis - by the EQM (Emirates Quality Mark) scheme. TUV Rheinland is appointed by MOIAT to issue either ECAS- or EQM-certificates proving, thus proving compliance with the UAE EESL technical regulation.

How can TÜV Süd help you meet UAE standards?

Ensure that your products successfully meet UAE's standards by working with a market leader, TÜV SÜD. TÜV SÜD fully understands the local requirements and procedures applicable in the UAE. The Emirates Conformity Assessment Scheme (ECAS) is a Product Certification Scheme that ensures services and products conform to relevant UAE standards.

Who is the accredited i-Rec issuer for the Emirate of Abu Dhabi?

Accordingly, an agreement has been signed between both parties, appointing DoEas the accredited I-REC Issuer for the Emirate of Abu Dhabi. A distinctive feature of the agreement with DoE is that, for the first time worldwide, the I-REC Standard allowed issuance of RECs for power generated from nuclear energy, among other technologies.

Who is responsible for regulating energy activities in Abu Dhabi?

Under article 9 of the DOE Law, an establishment or individual is prohibited from engaging in any activity in the energy sector in Abu Dhabi without obtaining the required licence from the Abu Dhabi DOE. Under the RSB Resolution and the Dubai IPP Law, the Dubai RSB is responsible for licensing Regulated Activities.

Energy storage systems consist of equipment that can store energy safely and conveniently, so that companies can use the stored energy whenever needed. Energy storage systems are reliable and efficient, and they can be tailored to ...
