Learn More. Learn More. Thoughtful Innovations. Designed For Scale. Wonderfully Insightful. Topology. VLAN Management.

This is not like a UPS or battery backup. It's meant to provide a secondary power supply to the devices it's compatible with. So if a switch or console's PSU fails, the RPS will provide power to it until the bad PSU can be replaced. If the power goes out completely, this RPS will also go off. Unless of course it's plugged in to a UPS.

Power Backup. Pretty sure you're talking about the RPS, which is a "redundant power supply." It is not a UPS, which is an "uninterruptible power supply" - which comes with batteries. AFAIK Unifi does not make a UPS. RPS is designed to provide power in case the equipment's on-board power supply unit fails, not if your incoming power fails.

Designed to supply power to an entire rack-mounted UniFi system and remotely manage each connection. ... Power Distribution Pro. USP-PDU-Pro. Datasheet. In The Box. Marketing Images. Installation Guide. Zoom in. Zoom in. Mechanical; Dimensions: 442.4 x 87.4 x ...
