

# Ups power backup staples

How many volts does a UPS backup use?

Most UPS backup models will indicate their particular volt-amperes (VA) output. The higher the VA rating the more stored power and running capacity available. For single devices and smaller operations, 200 to 450 volt-amperes will generally suffice. Need more power?

What is an APC battery backup system?

APC battery backup systems help manage power while protecting your data and office equipment. At Staples, browse a wide variety of APC UPS systems.

What if I can't repair my APC back-ups pro power supply?

Tech help available for set-up & troubleshooting. If something happens that we can't repair it, we'll replace or reimburse you. The APC Back-UPS Pro uninterruptible power supply provides power to your critical devices during an outage, allowing you to continue working or gaming and stay connected to your network.

Why should you buy an UPS backup system?

This power-saving battery backup gives you added peace of mind with its safety provision. The leak-proof, warranty-guaranteed UPS backup system provides data line RJ45 10/100 Base-T Ethernet protection. It also comes ready with an LED display to indicate potential dangerous wiring issues in a wall circuit.
