A trailblazer in solar since 1997. With over 205 gigawatts shipped worldwide and counting, Trina's photovoltaic panels and solar system components provide clean, affordable and reliable energy to homes, businesses and power plants around the world.

A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array. Additionally, there is evidence homes with solar panels sell faster than those without.

Because all imported products need to be labeled as such according to Title 19 Chapter 4 Section 1304 of the US code, finding USA-made solar panels is easy in theory if you look at the labels. When looking for an American-made product, you should look specifically for the FTC-protected "made in the USA" label.
