

Vacant land for solar power plants

How to get a solar farm on your land?

If you're a landowner and you have acres of unused land lying around, you might be thinking about how to get a solar farm on your land so you can create more income. The answer lies in leasing out your land to a solar company. It's a brilliant way to give back to the environment and make money at the same time.

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

Can I lease my land for a solar farm?

Leasing your land for a solar farm can help you create a steady income for 25+ years. Contact us today and find out if your land is suitable for a solar farm.

How does a solar project affect landowners?

Once the solar project is operational, there is generally no impact on the daily activities of the landowners, aside from the occasional maintenance visit. More and more often, we see that dual use of the land is being considered, also known as agrivoltaics, so that the land can be farmed and generate electricity from the sun in the same space.

How much money can you make leasing land for a solar farm?

Most landowners ask this question, and it is a genuine query that should be asked before you end up leasing your land to a solar developer. The short answer is that you can make somewhere between \$300 to \$2,200 per acre every year by leasing your land for a solar farm.

Does a landowner have to maintain a solar farm?

The landowner receives annual lease payments and has no obligation to maintain the solar farm. The team at OYA believes in long-term, trusted partnerships with landowners that are built on integrity and reliability. Our knowledgeable project developers will guide you through each step ensuring that any questions or concerns are addressed.
