Science and technology institution VDE created VDE-AR-E 2510-50 in May 2017 as a set of specifications for safety requirements for stationary battery energy storage systems (BESS) with lithium batteries. The VDE standard put forward strict technical requirements and test conditions for energy storage systems in terms of electrical safety ...

VDE-AR-E 2510-50:2017-05. No decision rule is specified by standard, when comparing the measurement result with the applicable limit according to the specification in that standard. The decisions on conformity are made without applying the measurement uncertainty ("simple acceptance" decision rule, previously known as "accuracy method").

Pylon Technologies (Pylontech), which already achieved the 2PfG 2511 and VDE-AR-E 2510-50 accreditation in 2017 -- and in fact was the first company to do so -- said earlier this month that it is now the first Chinese manufacturer to pass Japan's stringent earthquake test requirements. Pylontech received Earthquake Disaster Countermeasures Standard for Battery ...
