

Villagers want to make money from solar power

Can solar power power a village?

A few of the villages' houses already have small, simple solar-power systems set up to power a few low-power LED lights and charge cellphones. These early solar installations, Inam explains, will now provide their owners with an opportunity to earn revenue by selling excess power to neighbors who lack any source of electricity.

How do villagers use solar energy?

They note the energy is renewable. Now, villagers often gather in the evening to continue the day's work. They also gather to watch television shows on cellphones that are recharged by solar panels and that help children do schoolwork by providing light.

How can a village based solar PV system be financed?

They have therefore identified additional financing sources through cross subsidies or government budgets to cover the difference. Similar provisions would be required for solar PV based, village scale electricity supply in smaller towns and villages to guarantee economic survival of these systems.

What's going on with villagers without off-grid solar panels?

Villagers without off-grid solar panels are stuck on waitlists while Sumba Sustainable Solutions looks for more funding. They're hoping for support from Indonesia's \$20 billion Just Energy Transition Partnership deal, which is being negotiated by numerous developed nations and international financial institutions.

Can solar power supply be implemented in a village?

Since such solar power supply forms part of village infrastructure, its successful implementation requires other types of knowledge, policies and support mechanisms than individual standalone systems and centralized grid electricity supply as shown by previous studies ,,,,,.

Can village scale solar power supply be sustainable?

Our cases demonstrate that a variety of sustainable, technical and organizational solutions for village scale solar power supply is possible. However, these conditions do not automatically lead to delivery models that are well adapted to the local contexts.
