

Vivint solar panels reviews

Why do customers complain about Vivint Solar panels?

Customers complain that they were promised specific savings or even free solar panels and either ended up paying more per month after the installation or got unknowingly locked into a lease agreement with steep cancellation fees. The third and possibly the most egregious issue mentioned in Vivint reviews is a lack of a response to warranty claims.

Does Vivint install solar panels?

In addition to the two main solar panel brands, Vivint also installs two kinds of solar batteries to provide backup power, and it offers free solar monitoring apps and smart home technologies along with the inverters and microinverters it installs from Enphase and SolarEdge.

Is Vivint Solar a good company?

When you work with Vivint Solar, you will also be dealing with Sunrun's employees. Positive reviews for the company mention the quality of the solar panels and the speed and ease of the installation. More critical reviews mention little to no changes in monthly electric bills and aggressive sales tactics, such as spam phone calls.

How much does a Vivint Solar System cost?

How Much Does Vivint Cost? The typical solar array--sized at the average of 9 kW--from Vivint is expected to cost between \$18,256 and \$20,538. These numbers are based on average system sizes and installation costs for the solar panel brands Vivint carries.

Does Vivint offer a solar lease?

One of the upsides of Vivint and its parent company, SunRun, is that they make solar super accessible to a wide range of customers. Although the solar leases they push on customers aren't as beneficial as other options, they require no down payment and often no credit check and they provide instant energy savings in most cases.

How does Vivint Solar work?

The remote system monitoring from Vivint will allow you to report any problems and check on the effectiveness of your actual system. The financing plans and options from Vivint solar will change depending on your location, your credit score, and the style and design of your home solar system.
