

Washington dc solar energy

Can you get paid for solar power in DC?

D.C. has set a renewable portfolio standard goal to produce 5% percent of its electricity from solar resources in 2032, and you can get paid to help. Under this program, you are granted one D.C. SREC for each megawatt-hour (MWh) of clean electricity your panels produce, which you can then sell in the SREC market.

Does Washington DC offer solar incentives?

If you're considering installing solar in Washington D.C., the most important solar incentive to be aware of are solar renewable energy certificates (SRECs). D.C. is one of the few governments that offer this performance-based incentive to people generating solar electricity.

Why is solar power growing in Washington DC?

Solar power in Washington, D.C. has been growing in recent years due to new technological improvements and a variety of regulatory actions and financial incentives, especially a 30% tax credit, which has been extended with a phase down approach.

What is sustainable DC?

The District's Sustainable DC initiative establishes goals and targets for responding to climate change. Additionally, the Clean Energy DC (CEDC) Omnibus Act of 2018, raised the percentage of solar energy carve out in the District from 5% to 10% by 2041.

Who can benefit from solar for all?

District residents who live in a condo or apartment can still access the benefits of Solar for All. Community Solar programming bridges the gap for District residents. We work with area contractors to develop Community Renewable Energy Facilities (CREFs) - aka large-scale community solar installations -- on various structures around the District.
