

Presently, India is in the stage of installation of solar photovoltaic panels and no focus is being given towards the impending problem of handling solar waste. The absence of ...

Presently in India, approximately 200,000 tonnes of solar photovoltaic waste are expected to be produced by 2030 and 1.8 million tonnes by 2050, by which time solar waste could grow to 60 million ...

India's solar energy sector is growing exponentially and has set sights on an ambitious target of 100 GW of solar energy by 2022. The cumulative capacity of grid-connected solar photovoltaic ...

The ministry directed the Central Pollution Control Board to amend the 2016 E-waste Rules to include antimony in the "hazardous substances" category ... We must also ban photovoltaic waste from reaching ...

The renewable energy sector is expected to grow by 48 or 825 GW by 2021 and solar panel deployment at 30,000 ... identifying the risk and opportunities resulting from solar PV waste. ...

Advertisement for Postponed of E-tender. Tender notice no. is - 1259 & Dated 30.01.2024; Public Notice - Procedure for Submission of Application for Registration of Refurbisher/ Recycler by the State Pollution Control Board ...

Every manufacturer and producer of solar photovoltaic modules and cells must store the waste generated up to the year 2034-35 according to Central Pollution Control Board guidelines. All solar equipment and material ...

The rules mandate that solar module manufacturers and recyclers register with a central portal of the Central Pollution Control Board (CPCB) and file their annual returns. The module makers were also asked to store solar module or cell ...

Waste photovoltaic central control board
