

The increasing global demand for sustainable energy solutions has intensified the need to replace fossil fuels in gas turbines, particularly in aviation and power generation where alternatives to ...

In February 2025, I had the wonderful opportunity of visiting one of Singapore's most iconic destinations: Gardens by the Bay. Tucked right next to Marina Bay, this futuristic nature park is ...

According to ISO 4, journal titles should be abbreviated to their unique and most frequently used form. The abbreviated title should be used in bibliographic references and enclosed in brackets immediately following the ...

Heavy rains and flooding in northern China killed four people while others remain missing, officials said Monday, amid flood warnings and evacuations. The victims were caught in a landslide in ...

Gravitational Vortex Turbines (GVTs) can provide clean energy to off-grid areas, known as Non-Interconnected Zones in Colombia, by inducing a water vortex in a turbine-generator set. The ...

Bearings enable flexible movement of various components in the bogie section while ensuring sufficient support and stability, thereby guaranteeing safe and smooth operation of the train. ...

The distant siren goes off at dawn, a warning that the turbines are starting and the water will soon be rising. Miss Becka sits on her porch drinking instant coffee, an open journal in her lap ...

In this state-of-the-art review, we identified that blades, nozzles and needles, bearings, and shafts are some of the critical parts in turbine that require continuous monitoring. For these critical ...

Take, for instance, the Waterlily Turbine. What exactly is this? Well, it's a compact device with a spinning wheel. When you place it inside running water, the wheel spins, and this produces power, which you can use to charge ...

This review provides a comprehensive summary of current research on FSI in pump-turbines, encompassing both experimental investigations and numerical simulations. Key topics ...

Savonius turbines are one type of turbine that, when combined with hydrokinetic systems, will produce clean and accessible energy. The Savonius vertical wind turbine must be started non ...
