

Wayne smart power 24-volt emergency sump backup control box

What is a Wayne 12 volt esp25 back-up pump?

The WAYNE 12-Volt ESP25 back-up pump includes all new epoxy steel body and cast-iron base, no more plastic. Perfect size for my pit with existing sump pumps. This unit provides protection and peace of mind when the power goes out or your old pump fails. Includes an audible alarm, you'll be notified as soon as it turns on.

Does Wayne have a battery backup system?

ESP25 battery backup system (upgraded version... Indoor Use Only - This 12 Volt WAYNE basement battery backup sump pump is perfect to keep your basement dry during heavy water flow when you lose electricity. Whether it's rain, snow melting, etc. WAYNE model ESP25n can keep your basement dry.

What is a battery back-up sump pump?

Battery Back-Up Sump Pumps are added in addition to your primary sump, and are powered off a 12 Volt battery. This completes your sump pump system and provides additional protection to remove ground water during a power outage, primary pump failure or heavy rain. Sewage Pumps are automatic pumps used in heavy duty applications.

What is an esp25 battery backup system?

ESP25 is a 12 volt battery back-up sump system with a high flow pump, smart charging technology, audible alarm, and led indicator lights to inform homeowner when the back-up system has been activated and the charge status of the battery. The Wayne reinforced thermoplastic battery backup system pumps up to 3300-gallons per hour.

What is a Wayne reinforced thermoplastic battery backup system?

The WAYNE reinforced thermoplastic battery backup system includes a unique float switch design that will operate the pump with minimal travel area to fit in smaller pits, reducing float switch hang ups.

What is a good battery back up system for a sump pit?

Great reliable battery back up system for your sump pit. The system requires the purchase of a sealed lead acid battery. The system is packaged very nicely with very easy reading instructions. There are two ways of using the back up. One way is with a dedicated discharge line and the second is with a joined discharge line.
