

## We energies solar buyback rate

What happens if a customer exports more solar energy?

If the customer's system exports more solar energy than their grid usage, WE Energies multiplies the net excess by the Buy-Back Rate listed in its Customer Generation Rates and applies the total as a bill credit.

How much does it cost to buy back a kWh?

That rate is currently \$0.042/kWh for standard residential customers, and there are separate Buy-Back Rates for customers on a Time of Use billing plan.

What if a customer's energy bill exceeds the energy used?

If a customer's generation in a month exceeds the energy they used, WPS provides a credit on the customer's bill using a formula for the value of the energy. The formula used is 45% of the on-peak rate (\$0.04644) plus 55% of the off-peak rate (\$0.03242) under rate schedule PG-2A, plus a \$0.00831/kWh transmission credit.

Does WPS offer credit for solar energy?

Like all other utilities in this list so far, WPS offers full retail-rate credit for solar energy sent to the grid up to the total of energy the customer used when the sun wasn't shining. If a customer's generation in a month exceeds the energy they used, WPS provides a credit on the customer's bill using a formula for the value of the energy.

How much is Wisconsin Electric Power Co (We Energies) worth?

That's between \$240 and \$1,200 that you may now be paying to Wisconsin Electric Power Co (We Energies) each year for no reason. Finding out what's available to you is as simple as a phone call or email to Wisconsin Electric Power Co (We Energies). Even a small savings can be worth it.

How much does solar energy cost a month?

As we covered above, some utilities pay less money for monthly excess electricity, oftentimes a rate of just 3 or 4 cents per kWh, versus the average retail cost of about 14.5 cents per kWh. If you're a customer of Alliant, WE Energies, or WPS, you won't want to generate too much extra solar energy every month.
