Findings are reviewed by our editorial team.

Are wind stocks a good investment?

Wind stocks benefit from many of the advantages wind energy has over other types of energy sources. Wind energy is a rapidly growing area of the alternative energy industry, and accounted for more than 10% of U.S. energy production in 2022.

How many wind energy stocks does ETF hold?

As of mid-2024, it held more than 55 wind energy stocks. Of note, its top 10 holdings included Vestas Wind Systems, Siemens Energy, and NextEra Energy. The ETF has a heavy concentration of foreign-listed wind energy stocks; Denmark-listed wind stocks made up the largest country share of its portfolio, at almost 17%.

Is wind energy a good investment?

Although wind energy is growing in importance, few companies focus solely on manufacturing wind turbines and components or producing wind energy. Only a couple trade on major U.S. stock exchanges. That leaves investors with few domestic pure-play wind energy investment opportunities.

What makes a 'wind stock'?

As with many alternative energy investments, there's no bright lines to what makes a "wind stock" as opposed to a company that does other things and merely dabbles in this area. Consider General Electric (GE), which is undoubtedly a big player in the wind sector, as its onshore wind segment generates billions each year.

What is a wind energy company?

The leading global producer of wind and solar energy. A global energy company focused on the power, wind, and electrification markets. A Danish manufacturer, seller, installer, and servicer of wind turbines. An energy technology company with a wind turbine subsidiary. A clean energy infrastructure company with significant wind assets.
