

What stocks are upstream of photovoltaic panels

Are solar energy stocks a good investment in 2023?

To skip the detailed overview of the solar industry, go directly to the [5 Most Promising Solar Stocks According to Analysts](#). Solar energy stocks took a beating in 2023. Global X Solar ETF (RAYS) and Invesco Solar ETF (TAN) are down 41.38% and 29.83% for the year, respectively.

What is the difference between upstream and downstream solar companies?

In the solar industry, upstream companies are those involved in the production of solar panels and other components, while downstream companies deal with the installation, sale, and maintenance of solar systems. There is a large disparity in gross margins between these two types of companies. Downstream companies often face higher barriers of entry due to brand and sector complexity. The solar industry has undergone significant maturation in the past decade.

What are the top solar stocks?
