

What to do if you bought downgraded photovoltaic panels

How do I get rid of a defunct solar panel?

Give your defunct solar panels to your solar panel installer. Under EU regulations (which still apply, even post-Brexit), your solar panel installer is legally obliged to take your defunct solar panels off you, or at least fund a Distributor Take-back Scheme (DTS).

Should you upgrade or replace your solar panels?

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades.

How do I recycle solar panels?

This ensures that all solar panels are collected and recycled properly. So, get on the phone to your solar panel installer - they'll know what to do. It's most likely they'll take your panels to a Designated Collection Facility (check the DFC database to find one near you) before the panels go on to a recycling point.

Are old solar panels better than new solar panels?

Over the past few decades, the efficiency of solar panels - how well they convert sunlight into electricity - has seen significant improvements. Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models.

What should I do if my solar inverter goes off?

If it trips back to the off position, leave it off and call an engineer. Also check your inverter for any fault codes or error messages. Check the real-time and cumulative generation on your inverter (most have these options) to make sure that the solar panels are still generating electricity.

How much does solar panel recycling cost?

Domestic solar panel recycling is completely free, all you need to do is contact your installer and they'll do the rest. If you're a business who wants to recycle your solar panels, there will likely be a charge. The cost of this will depend on the amount of solar panels you have, the type and the logistics.

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from ...

1. Storing energy to be used later. Excess electricity can be captured and stored, to be used at a later time when there's not enough electricity being generated to meet demand. The most popular option for this is battery ...

What to do if you bought downgraded photovoltaic panels

A few things, if they do a line side tap (may or may not be legal where you are), then they don't have to downgrade the breaker. Otherwise they back feed into the main panel. Rule is the sum ...
