What types of generators does Siemens offer?

Discover Siemens Energy's robust range of generators, including industrial and heavy-duty generators ideal for power plants, commercial use, and renewable energy applications. Get expert advice on our power plant equipment.

Are SGen generators suitable for industrial applications?

Our SGen series generators are specifically optimized for industrial applications, offering a robust power range up to 370 MVA. We understand the critical need for high-performance equipment that delivers uninterrupted power. For 2-pole applications over 25 MVA, our SGen-100A/SGen-1000A series is the optimal solution.

What is the power range of a SGen generator?

Our generators cover a power range of over 25 MVA. In addition, we provide wind generators from 0.25 to 10 MW. Our SGen series generators are specifically optimized for industrial applications, offering a robust power range up to 370 MVA. We understand the critical need for high-performance equipment that delivers uninterrupted power.

What is a dynamo generator?

A dynamo is simply a very small electricity generator. At the opposite extreme, in real power plants, gigantic electricity generators are powered by steam turbines. These are a bit like spinning propellers or windmills driven using steam. The steam is made by boiling water using energy released from burning coal, oil, or some other fuel.

Why should you choose SGen power plant generators?

As a leading provider of power plant generators, we understand the critical need for high-performance equipment that delivers uninterrupted power. The SGen series exemplifies our commitment to industrial-grade quality and efficiency, making it an ideal choice for those seeking a heavy-duty generator for demanding environments.

Why should you choose Siemens Gamesa wind generators?

Proven more than 40,000 times all around the world, our wind generators provide maximum energy yield and highest system availability. For all common wind turbine types up to 10 MW, on- and offshore. Learn more about the Siemens Gamesa Wind Business
