

# Where is freshwater found

New findings from studying over two decades of satellite observations reveal that the Earth's continents have experienced unprecedented freshwater loss since 2002, driven by climate change, unsustainable groundwater use and extreme ...

**Freshwater Biomes** Freshwater biomes have water that contains little or no salt. They include standing and running freshwater biomes. Standing freshwater biomes include ponds and lakes. Lakes are generally bigger and ...

Water covers more than two thirds of the planet, but readily accessible fresh water - found in rivers, lakes, wetlands and aquifers - accounts for less than 1 per cent of the world's water supply. As the global population ...
