

# Which areas are better for installing photovoltaic panels

How do I choose the best solar panels?

They may recommend choosing a location for the solar panels that's not obvious from the street, such as a rear-facing roof. You should also choose solar panels that blend in with their surface. Depending on your roof's appearance, this may mean using solar tiles or black solar panels.

Can solar panels be installed in a conservation area?

To increase the chances of your solar panel installation being approved in a conservation area, you can make a few upfront choices, such as: Selecting solar panel styles that blend in with your roof or building's design, such as solar tiles. Black solar panels tend to look much more appealing than blue

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

How do I choose the best solar panels for my roof?

You should also choose solar panels that blend in with their surface. Depending on your roof's appearance, this may mean using solar tiles or black solar panels. It may also help to buy smaller or fewer panels to minimise the visual impact.

Should solar panels be installed in landscape orientation?

Installing solar panels in landscape orientation is often the default choice for solar designers. The simplicity of design and installation, coupled with the widespread use of landscape-mounted panels in commercial installations, makes it a go-to solution for many solar projects. However, simplicity does not always equate to optimal performance.

Where should solar panels be placed in the UK?

The best spot for solar panels in the UK is a roof that faces south and has a tilt of about 35 degrees. But remember, these are just general guidelines. Other factors - like shading from your immediate environment and your specific location - could affect where your installer can place your solar panels.
